

Ecoflex

**GUIDING PRINCIPLES
WERE ECOLOGY, ECONOMY
AND FLEXIBILITY**

by **Senator**

Design Justus Kolberg

The design of Ecoflex sought to shy away from overt styling to a more calm design language with an architectural quality. The guiding principles that were deployed of ecology, economy and flexibility are clearly evident in the final chair. The meticulous engineering detailing of the back frame integrates features for the optional height adjustable arms and the height adjustable lumbar support. The chair utilises a new generation of dynamic synchronous action that provides the user with flexibility, comfort and simplicity of adjustment.

STANDARD FEATURES

- Dynamic synchronous tilt action featuring a high geared tension adjustment and a three stage travel limiter and upright lock
- 3D self supporting mesh back in Black
- Adjustable lumbar support
